# Flush Truck Services

- **Mainline Sewer Back-Up**

- **Combination Flush Trucks** for high pressure jetting and vacuuming of blockages and debris

- **Lateral Sewer Back-Up**

- **Hot Water/Steam Jetting Trucks** to flush and break apart sewer blockages

- **Sewer, Storm Culvert & Production Pipeline Jetting:**

- **Removal of** sludge, sand, grease, debris, and obstructions in lines
- **Reaming and cutting of** infiltrating roots, lodged debris, taps, and calcium deposits

- **Pre-Cleaning and Prep Work for CIPP Installation**

- **Pre-Cleaning of Pipelines Prior to Camera Inspection**

- **Storm Basin Cleaning**

- **Wash and Vacuum storm basins**
- **High pressure jetting** of basins, inlets, and outlets free of debris
- **Non-entry tools** that can remove awkward, heavy debris that a vacuum system can't without the need for combined space entry permitting

- **Sewer Bypass**

- **Vacuum truck(s) support** for sewer bypass to dispose of debris downstream or at an off-site location
- **Deep lift pulls:** utilization of proprietary industrial equipment that allows vacuuming at deep depths to break blockages free

- **Lift Station Cleaning**

- **Total Removal of** grease, rags, sludge, and organic debris
- **Vacuuming and High Pressure Washing of** debris in sewer/storm pump stations
- **Confined Space Entry Equipment and Gear**

## Camera Services

- **CCTV Mainline IBAK HD Camera Inspection:**

- **High Definition Video Inspection Range**  
4" (100 mm) - 60" (1500 mm) + 1600' of cable reach

- **High Definition Imaging of Regular Maintenance To Check Aging Pipes**

We look for condition, root intrusion, cracks, fractures, pipe breaks, sags, blockages, cross bore activity, etc.

- **Locating Problematic Areas**
- **Laser Profiling of Pipe Roundness and Ovality**

- **CCTV Mainline IBAK Robotic Cutter:**

- **Video Inspection Cutter Range**  
8" (203.2 mm) - 32" (812.8 mm) + 1000' of cable reach

- **Targeted Removal Of:** calcium deposits, intruding lateral pipe (taps), root infiltration, concrete, metal, exposed gaskets, obstruction of debris such as blockages in pipe, and cross bore activity.

- **Reinstatement of laterals (CIPP)**

“

The crew at Supreme Vac are a top-notch group. They provide reliable, efficient, round the clock service and respond when you need them. They have a professional, hard-working team and I would definitely recommend their services.
